

COMPAK CUBE TAMP - AUTOMATIC TAMPER

Consistency of pressing in all services, flat and without residues.

Its small size makes it the ideal complement for coffee shops that want to guarantee optimal extraction.

Compatible with most filter holders on the market.

Ensure consistent puck integrity through unmatched pressure control. Has an adjustable tamping pressure from 10 to 30kg with measure unit selection (kg/lb). Adjustable portafilter holder height to fit all types of portafilters, so able to be used on a variety of different coffee machine brands. A manual cleaning mode to help clean coffee residue off the puck. Also comes with an OLED display with touch pad for clear use and enlightened tamping area.
