

# PUQPRESS – Q2 AUTOMATIC TAMPER

Bring complete consistency to your coffee making with the Puqpress. The fully automatic tamper makes it possible for barista's to achieve perfect tamping consistency. It allows complete consistency between baristas and no need to adjust grinders, for different tamping pressures. No more uneven tamps just simply place the handle in the holder and pull it out, for a perfect, level tamp every time.

Tamping is an important part of the baristas craft, but doing it by hand hundreds of times a day damages shoulders and wrists. So why not try a Puqpress today. Your barista will thank you for it.

Precision coffee tamper with an adjustable tamping force, ranging from 5–30kgs. The non-stick tamp head helps to reduce coffee build up, but can also be very easy to clean with the cleaning mode via one touch of the LCD screen. The Q2 now has an advanced stiffer frame that provides further precision and life span. The new design now works perfectly with your naked portafilters and can be adjusted for a range of different machine handles by simply adjusting the handle cradle.

## TECHNICAL SPECIFICATIONS

- Motor Output: 72 watts
- RPM: 1345
